SIGMA LIFE CARE

About Us

Sigma Life Care is one of the most trusted pharmaceutical exporter in India. We are a brand name in the pharmaceutical industry who we are always consistent with their services and we are one of the leading pharmaceutical exporter in India. We are a government authorised company who are experts in providing a premium platform to ensure all kinds of pharmaceutical supplies are done across the globe without compromising the quality of the products. Sigma Life Care are a dynamic and professional pharmaceutical exporter global business perceptive. We serve to the needs of International Market. We export branded and generic drugs manufactured by globally renowned pharmaceutical companies such as Cipla, Sun Pharma, Alkem, Natco, Ajanta Pharma, Bharat Serum, Abbott and more. We supply superior quality, 100% genuine medicines at highly competitive prices. Our response to business queries is fast and our business practices are ethical, transparent and customer focused.

OUR VISION

- ✓ To continually set new benchmarks in global healthcare with the power of human expertise, innovative research and advanced technology

OUR MISSION

- ✓ Contributing to better healthcare through innovation. Maximizing value for our customers.

OUR VALUES

- ✓ Innovation
- ✓ Customer Delight
- ✓ Ownership & Collaboration
- ✓ Performance Focus
- ✓ Care For Society

OUR PRODUCTS

Sigma Life Care Designs, develops, manufactures, markets and exports a wide range of medical surgical disposables used in hospitals and acknowledged for reliable, trouble free performance, optimum functionality, high efficiency and longer working life.

I.V. Cannula with Injection Port & Wings, Sterile - CE Marked

I.V. Cannula with Injection Port & Wings, Sterile is a high quality product and trusted all across the globe.

I.V. Cannula with Injection Port & Wings, Sterile is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach

Needle:-

Siliconised, bevelled, back cut ground stainless steel needle for smooth and painless venipuncture. Made of Stainless Steel AISI304 diameter and length according to ISO standard.

Needle Hub:-

All I.V. Cannulae have specially designed needle hub to prevent any de-stabilisation and bending of the needle during venipuncture. Specially curved thumb guard for proper grip during insertion.

Needle Cover:-

Protects the needle and catheter from contamination. Prevents accidental damage to the needle and catheter.

Catheter:-

PTFE (Poly Tetra Fluoro Ethylene) / FEP catheter is dual tapered, bevelled tip & siliconized which offers high resistance to kinking.

Minimum resistance during insertion due to its lowest coefficient of friction & improved tip design. High chemical resistance and excellent bio compatibility. Thin walled catheter allows maximum flow rate for a specific gauge of Cannula. Optimum trim distance. Choice between stripped radiopaque and transparent catheter.

Flash Back Chamber:-

Flash back chamber allows monitoring of instantaneous flash of blood after venipuncture confirming correct catheter placement. Specially designed to prevent any spillage of blood.

Wings:-

Angled wings offer easy fixation and prevent slipping & rolling of cannula over the patients body.

Injection Port:-

Provided with injection site. Which has one way retreating valve (silicon tube) to facilitate extra medication and to prevent back flow. The Injection valve is provided with specially designed cap incorporating a recessed plug with a protective skirt to effectively prevent contamination when the valve is not in use. It offers safe and convenient method of atraumatic administration of medicines.

Colour coded to identify the gauge of the needle.

The product is sterile and individually packed in rigid blister sealed with peel-open type medical grade paper. (Tyvek packing available upon request). Disposable, Sterile, non-toxic and Non-Pyrogenic. Each I.V. Cannula is provided with a threaded stopper.

Features:-

Needle sharp tip is enclosed inside a plastic cage after pulling out.

The plastic cage is designed as such that once needle sharp tip in fully enclosed inside it can not come out of the cage hence prevent Healthcare professionals from the risk of accident due to needle stick injury of injection.

The size of Safety I.V. Cannula is similar to conventional I.V. Cannula and the technique of cannulation is similar to cannulation technic of conventional I.V. Cannula.

Size	Colour	I.D. in mm	O.D. in mm
14G	Orange	1.7	2.1
16G	Grey	1.3	1.7

20G	Pink	0.8	1.1
22G	Blue	0.6	0.9
24G	Yellow	0.5	0.7
26G	Violet	0.4	0.6

I.V. Cannula Without Injection Port, With Wings, Sterile

I.V. Cannula Without Injection Port, With Wings, Sterile is a high quality product and trusted all across the globe. I.V. Cannula Without Injection Port, With Wings, Sterile is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach

100% Safety:-

Our I.V. Cannulae can be used safely without the risk of Thrombophlebitis. It is made of Virgin P.T.F.E. (Poly Tetra Fluoro Ethylene) Catheter, one of the most bio-compatible materials known to man. Virgin P.T.F.E. Catheter: As P.T.F.E. has the lowest coefficient of friction, our I.V. Cannulae reduces the chances of sticking to vascular walls. The P.T.F.E. clear catheter, designed and made double tapered with a formed tip & siliconisation, offers lower resistance during insertion, resulting in less trauma to the patient and it avoids peel back effect. The thin walled catheter has a large diameter, leading to 10% faster flow rate.

Improved Siliconised Needle Point:-

Precisely honed point enables smoother penetration for rapid closure after needle withdrawal and this also reduces fluid seepage and Postdural Puncture Headache (PDPH.). Minimises the chance of inadvertent nerve damage.

Soft And Smooth Needle Cover :-

Protects the precisely honed needle point during handling.

Needle Hub:-

The extra thin walled needle has a hub with a large crystal clear flash back chamber indicates perfect and successful venipuncture with blood entry. The holding area of the needle hub is specially designed according to thumb impression, resulting in easy insertion and firm holding pressure of thumb on the smooth surface of the hub. Fully covered needle hub stabilises the needle inside the catheter to make insertion easier and safer.

Injection Port With A Snap Fit Protection Cap:-

This allows injection of medicine during infusion. Since the non-return valve can be opened only under pressure, the valve does not open accidentally, thereby preventing contamination.

Flexible Grooved Wings:-

The wings provide an angle between the plane of the wings and catheter, resulting in easy and comfortable adjustment after catheter insertion into the vein. The grooved wings helps ease skin fixation and prominent gripping.

Unique Porous Filter:-

The needle end is covered with a unique porous filter (fitted in needle hub) resulting in a higher flow rate and quick easy confirmation of correct vascular access. Avoids blood spillage and prevents formation of air bubbles.

Threaded Stopper With Luer Lock:-

This is the stopper used to stop the blood spillage after infusion is stopped. The threads inside the stopper tightens the stopper on main body and the luer lock confirms the stoppage of blood spillage.

Measured Volume Administration Set

Measured Volume Administration Set is a high quality product and trusted all across the globe. Measured Volume Administration Set is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach.

Specifications:-

- ✓ Floating auto shut-off valve in the calibrated chamber.
- ✓ Automatically shuts off drain path when chamber is empty.
- ✓ Also acts as level indicator in the chamber.
- ✓ 15 micron fluid filter.
- ✓ Kink free transparent PVC tubing for easy visualization of flow.
- ✓ Tube length 150 cm
- ✓ 6% taper luer, as per International Standard.
- ✓ Approximately 60 drops / ml.
- ✓ Sterile, single use and non-pyrogenic

Type:-

- ✓ Measured Volume Administration Set, 110ml
- ✓ Measured Volume Administration Set, 150ml

Infusion Set without air vent without medicine filter

Infusion Set without air vent without medicine filter is a high quality product and trusted all across the globe. Infusion Set without air vent without medicine filter is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach.

Infusion Set with air vent with medicine filter

Infusion Set with air vent with medicine filter is a high quality product and trusted all across the globe. Infusion Set with air vent with medicine filter is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach.

Bung IV, Sterile Disposable

Bung IV, Sterile Disposable is a high quality product and trusted all across the globe. Bung IV, Sterile Disposable is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach.

Specifications:-

Male - Female Luer Lock

Scalp Vein Set

Scalp Vein Set is a high quality product and trusted all across the globe. Scalp Vein Set is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach.

Specifications:-

- ✓ Scalp Vein Set is used for rapid venous access and for the greater patient comfort during infusion.
- ✓ Manufactured from non toxic, medical grade PVC compound.
- ✓ Thin wall, short bevel Needle facilitates non traumatic penetration.
- ✓ Wings are for better handling and attachment to the skin.
- ✓ Wings are colour coded for instant size identification.
- ✓ Proximal end of the set is provided Female luer fitting for easy connection with the infusion set.

Packing:-

- ✓ Sterile, individually packed in peelable pouch pack.
- Box of 100; Master Carton of 4000.

Examination Gloves - Nitrile, Latex Free, Powder Free

Examination Gloves - Nitrile, Latex Free, Powder Free is a high quality product and trusted all across the globe. Examination Gloves - Nitrile, Latex Free, Powder Free is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach.

Specifications:-

- ✓ Made from synthetic Latex, contain no latex proteins.
- ✓ More puncture resistant than natural rubber.
- ✓ Latex free, odour free and powder free.
- ✓ Standard : ASTM 6319, EN 455
- ✓ 3.2 Mil
- ✓ Packing : 100 Pcs per Dispenser box, 10 dispenser box per master carton

Size	Specification
✓ Small	Non Sterile, Disposable
✓ Medium	Non Sterile, Disposable

Lithium Heparin Tubes

NET brand Lithium Heparin Tubes (MOQ: 100,000 Pcs Assorted Size) is a high quality product and trusted all across the globe. Lithium Heparin Tubes (MOQ: 100,000 Pcs Assorted Size) is being manufactured and supplied by the company reputed because of excellent product quality, friendly service and professional approach.

Specifications:-

- ✓ NET Plasma Separating Tubes (PSTs) inner wall contains spray - dried sodium/ lithium heparin coating. The additives are anticoagulants, which block the coagulation of blood cells. Lithium heparin gel tubes contain gel at the base which acts as plasma separator. Heparin activates antithrombins and acts as an anticoagulant. The gel forms a stable barrier between the plasma and the blood cells. After centrifugation, the plasma sample is used for examination and improves plasma yield. Mixing recommendation: PSTs should be gently inverted 180° back and forth 8-10 times. Centrifugation instructions: 1300g for 10 minutes at 25° C room temperature.
